SNOWGUM UNISEX FOOTWEAR SIZING GUIDE

How to measure your foot....

* Place the edge of a sheet of paper against a wall on a hard floor surface (not carpet).

* Put your heel against the wall and relax your toes and mark a line on the paper to the end of your big toe, do this for both feet (make sure you are wearing socks).

*Measure both feet and take the longest measurement.

*Find your Actual Foot Measurement in the table below and then find the corosponding size in US sizing. This is the size you should select when ordering your footwear.

Don't add wriggle room to the measurement, we have already allowed for that in our foot length dimensions below.

And if the shoes don't fit, return them and we'll swap your size...
